**INTEROFFICE CORRESPONDENCE**

DATE: November 09, 1993

TO: K. D. Anderson, Environmental Operations Management, Bldg. 080, X6979

FROM: J. K. Anderson, Radiological Engineering, Bldg. 080, X6974

SUBJECT: RADIOLOGICAL ENGINEERING (RE) SURVEILLANCE OF SUBCONTRACTOR  
RADIOLOGICAL WORK PRACTICES DURING OPERABLE UNIT #15 (OU15) WORK IN A  
PRODUCTION BUILDING - JLA-043-93

This memorandum is to document a walkthrough and audit of ERM Rocky Mountain (ERM) subcontractor radiological work practices that was conducted on November 09, 1993. The general purpose of the audit was to review housekeeping practices inside the controlled areas, personal protective equipment donning and removal techniques, compliance to the Site Specific Health and Safety Plan (SSHSP) and the Radiological Work Permit (RWP), and to identify any radiological problems which needed further action. The criteria upon which observations were based included the OU15 Health and Safety Plan, Department of Energy (DOE) Radiological Control Manual (DOE N 5480.6), and the Environmental Management Radiological Guidelines (EMRG).

Health and Safety coverage for this activity is being provided by ERM. There was a Health and Safety Specialist (HSS) on the job site at the time of the surveillance. All radiological monitoring was being performed by EG&G personnel assigned to the building where the work was being performed. The work activity being performed at the time of the visit was rinsate sampling in a radiologically contaminated room.

There were no significant deficiencies discovered during this audit. All personnel were very knowledgeable on all aspects of the task to be performed and were performing the work in accordance with the SSHSP and the RWP. All ERM personnel had received the appropriate training that was specified in the SSHSP and all training was verified current.

Please contact me directly with any concerns or questions about the above correspondence. I may be reached at Extension 6974 or on Digital Page 3518.
